

PULSWAVE PLUS

SHOCKWAVES EQUIPMENT

SHOCK WAVE EQUIPMENT, EFFECTIVE AND POWERFUL

Thanks to continuous technological and therapeutic research, Mectronic has developed **PulsWave PLUS**, the shock wave device based on electromagnetic technology: a non-invasive and extremely effective therapy in numerous pathological situations..

WIDE RANGE OF POWERS

UP TO 200 mJ

WIDE RANGE OF FREQUENCIES

UP TO 25 Hz

ENERGY SUPPLY

FOR A PROPER CLINICAL DOSAGE

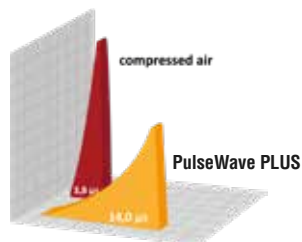

PERFORMANCE WITHOUT COMPROMISE

5 MILLIONS SHOT GUARANTEED

ULTRA SOFT SHOT

PulsWave PLUS shockwave therapy generates unique and innovative high-energy acoustic waves using a bullet that is 5 times stronger than standard systems. Thanks to a longer impulse rise time, it is possible to generate the same energy avoiding annoying pressure peaks.

MAGPULSE SYSTEM

The **PulsWave PLUS** device is equipped with the advanced and innovative **MAGPULSE** electromagnetic generator with minimal eddy currents, thanks to which

it is possible to generate Ultra Soft Pulse with high therapeutic compliance, thus allowing to generate up to 5 MILLION guaranteed shots.

5 MILLIONS

shots guaranteed

THERAPEUTICAL PROTOCOLS

PulsWave PLUS has an interactive menu with the possibility of using therapeutic protocols specially designed and divided according to the anatomical area to be treated.

It is also possible to create and save customized protocols, choose to treat the patient according to the effect to be obtained or select one of the non-localized pathologies present.

SWING MODE

The innovative Swing mode allows you to create a multi-frequency shock wave treatment. With this mode, the frequency of emission varies during the treatment, allowing the therapy to perform well on the different tissue targets.

Francesca Marcon - VOLLEY BERGAMO

TISSUE TARGET SYSTEM

Thanks to the Tissue target system, it is possible to set the therapy according to the type of tissue that will be treated, the desired effect and the patient's characteristics, for an increasingly precise and personalized calculation of the therapeutic dose.

REAL-TIME UPDATE

PulsWave PLUS has a USB socket on the back of the device, thanks to which it is possible to constantly update the software.
